Numbers

Mexico's surface: 1,964,375 km²

Republic: 31 States & 1 FD

Federal District's surface: 1,479 km²

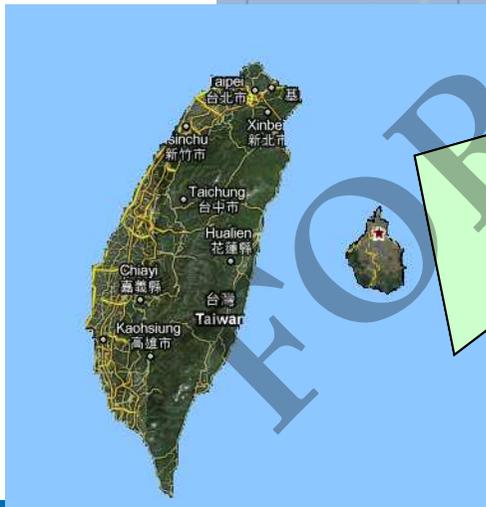

Population of Mexico: 112,336,538

Population of the FD: 8,851,080

With surrounding areas: > 20 million

Taiwan's surface: 36.000 km²

Taiwan's population: 22,400,000 (2001)

Disasters cannot be considered as a divine action nor is it produced by the force of mother nature; **disasters are not natural** they are mainly a consequence of physical and social vulnerability which is basically man-made

Main Hazards in Mexico

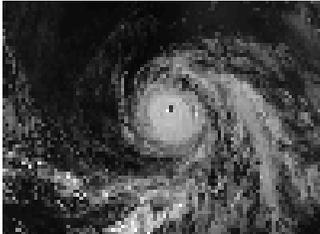

GOBIERNO FEDERAL

SEGOB

SISTEMA NACIONAL DE PROTECCIÓN CIVIL

HURRICANES

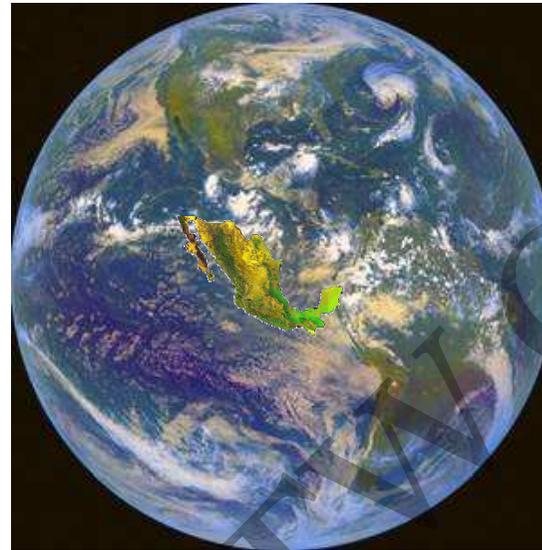

VOLCANOES

EARTHQUAKES

OTHER PHENOMENA:
Land slides, forest fires
droughts, etc.

Disaster are the product of incorrect policies, measures and actions taken by the society and its governments.

**A disaster does not occur ...
a disaster results !**

Disaster Impact in Mexico 1980-2009

GOBIERNO FEDERAL

SEGOB

SISTEMA NACIONAL DE PROTECCIÓN CIVIL

Period	People Killed	Damage Amount (Millions of US Dollars)	Annual Death Average	Annual Damage Average (Millions of US Dollars)
1980-1999	10,114	14,027	506	701
2000-2010*	1,702	13,461	170	1,346

1.- Para el periodo 1980-1999 se calcularon los daños directos en 10,390 millones de dólares y se aplicó un factor del 35% para estimar los efectos indirectos en dicho periodo conforme a estudios de la CEPAL. El total de daños estimado fue de 14,027 millones de dólares.

2.- Para el periodo 2000-2010 únicamente se cuantificaron los daños y muertes ocasionadas por fenómenos de origen natural (hidrometeorológicos y geológicos)

*/ El 2010 muestra cifras preliminares sujetas a revisión

These losses mostly impacted **more unprotected and vulnerable groups** of the population.

Evacuation planning is the preventive plan for moving people to safe areas (less risk) in an organized, structured and coordinated way.

Evacuation Planning

Evacuation plans must be specific, according to the place where they are instrumented and to the incidence of phenomena. Examples: Popo & PERE.

The development of these plans are normally executed by Civil Protection staff.

GOBIERNO
FEDERAL

SEGOB

SISTEMA NACIONAL DE
PROTECCIÓN CIVIL

Vivir Mejor

Desired behavior of people for a timely evacuation:

- Create behavior, safety and self-control habits
- Avoid panic in emergency situations
- Try not to be a hero
- Do not obstruct evacuation routes
- Internal and external communication
- Obey instructions
- Etc.

Success of an evacuation plan largely depends on training of both response groups and population.

- **Focus on the situation**
- **Identify the problem**
- **Determine objectives**
- **Identify necessary resources**
- **Develop an action plan**
- **Take related decision**
- **What has to be decide?**
- **What is the right moment to evacuate?**
- **Who must participate in the procedures?**
- **Is transportation enough for evacuation?**
- **What to do in case the plan fails?**

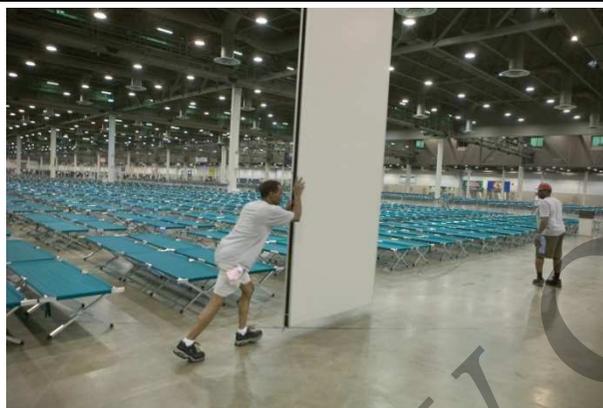

Example of a Huge Shelter: Louisiana

Temporary Shelter Management Techniques (Not Refuge)

GOBIERNO FEDERAL

SEGOB

Vivir Mejor

Fixed Shelters

- Schools
- Churches
- Auditoriums

Types of Shelters

Long-time Shelters

- Improvised services
- Prefabricated materials
- Used for a long time

Camps with Tents

Outdoors shelters with services, to be left as soon as possible

Stages in Temporary Shelter Management

GOBIERNO FEDERAL

SEGOB

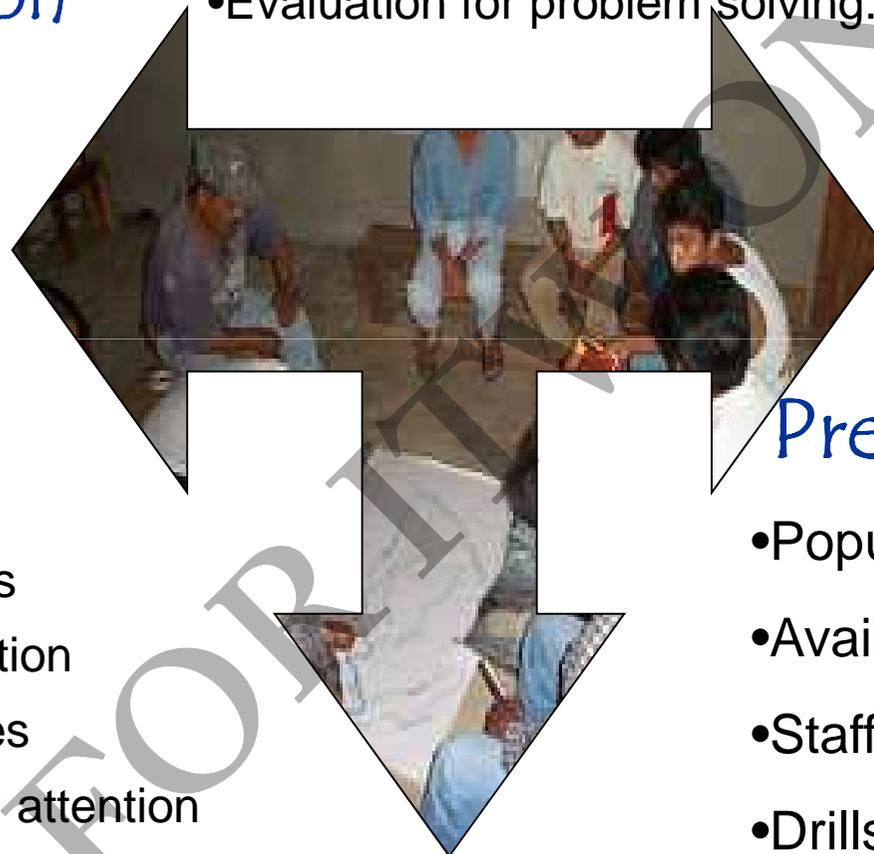

SISTEMA NACIONAL DE PROTECCIÓN CIVIL

Close and Evaluation

- Do people have where to go?
- Is it necessary to close the shelter?
- Evaluation for problem solving.

- Notification
- Distribution
- Registration
- Basic services
- Medical attention
- Social services
- Psychological attention

Operation

Preparedness

- Population counting
- Available facilities
- Staff training
- Drills & Exercises

According to Civil Protection related regulations, SEDENA gives support when disasters occur:

- **Medical and dentist services**
- **Vaccines**
- **Electric appliances repairing**
- **Haircuts**
- **Maintenance services**
- **Plumbing, masonry & ironworks services**
